Aiming for **sustainable and inclusive growth** that promotes talents, skills, and ambitions.

Making a significant impact on the **social and cultural progress** of the country.

Reinforcing an **ethical dimension** that is the foundation of our work.

This is our commitment.

This is the responsibility of a university capable of tackling major challenges by combining **scientific rigour** with **creativity,** **concreteness** with **vision.**

This is who we are: for 160 years, a benchmark for those who look into the future.

## **PREFACE**

### **Politecnico di Milano: identity, values, and aims**

Founded in **1863**, today Politecnico di Milano is the largest scientific-technological university in Italy. A modern university where, both in teaching and research, quality and innovation are the foundations of a strong and lasting relationship with the social and productive system and with foreign institutions in the fields of architecture, design, and engineering. A reputation built in one hundred and sixty years with commitment and vision.

Today, defining the university's development strategy means facing a **highly competitive system**. It means challenging the policies adopted by the world's leading universities, which are more attractive to students and professors, and able to draw financial resources. It means creating links within international networks outlining new scenarios in Europe and worldwide.

In a **global context** where knowledge and technological innovation are strategic drivers, easiness of access to information, knowledge, and expertise can lead to distorting effects, both for those who govern technologies and for those who are left behind. Academia has the challenging but complex task of rethinking the boundaries of knowledge and its area of application. This is accompanied by the progressive detachment of the financial system from the **real economy**, together with serious consequences for Western countries, with the progressive weakening of welfare policies, and with a growing sense of distrust towards institutions. This domino effect requires universities to play an ethical role due to their responsibility towards new generations.

It is within this unstable environment, recovering from a pandemic and challenged by a conflict in the heart of Europe, that Politecnico has to distinguish itself as a **solid, recognisable and reliable reference point**, both in Italy and abroad, capable of guiding public and private decisions in the long term.

In this time of uncertainty, we find in our founding values the reasons to build a future characterised by **continuous, sustainable, and inclusive growth**. Responsibility, respect, integrity, professionalism, fairness, trust and transparency lead every choice we make and every action we take toward a future in which students and staff are our institution's real asset.

**Donatella Sciuto**

Rettrice

A handwritten signature in black ink, reading "Donatella Sciuto". The signature is written in a cursive style with a horizontal line underneath the name.

## MISSION

**A leading guide. A landmark. A solid, recognisable, and reliable reference point for sustainable development in Italy and Europe.** This is how Politecnico di Milano intends to distinguish itself in the coming years: by its ability to tackle the main scientific and technological challenges according to an ethical dimension that interprets and declines the very concept of sustainability as a synonym for **equity, inclusion and shared growth.**

It is in the interplay between scientific rigour and creativity that our university aims to establish itself as an international community of people united in diversity. An attractive community for students and researchers from all over the world; dedicated to significantly contributing to social and cultural development.

## COMMITMENT TO SUSTAINABLE GROWTH

Politecnico di Milano, among the biggest universities in Italy, firmly embraces the principles underlying sustainable growth, of which the Strategic Plan is a clear statement. In the fullest and deepest sense of the term, sustainability means “caring for, supporting and fostering” an integral development of individuals and the whole society, as well as the environment. It is an expression of increased awareness and maturity. It indicates a unifying perspective for the three academic domains: research, teaching and social responsibility. It offers opportunities for shared growth within our community: from inclusion to diversity, from an improved quality of life to participatory involvement in university activities.

↳ In terms of TEACHING, sustainability means educating our students to critically address major global challenges and local needs, offering them appropriate models and concrete tools in an environment that fosters the right to education and equal opportunities.

↳ In terms of RESEARCH, a sustainable approach requires understanding and adequately assessing the ethical implications of scientific progress and technological development. It extends disciplinary perspectives to humanities. It develops partnerships with top national and international research institutions. It guarantees independent, high-quality research with a focus on talent development and the careers of young researchers.

↳ In terms of SOCIAL RESPONSIBILITY, a sustainable proposal recognises and consolidates actions and projects in response to the needs of the city, the region, the country and in terms of international cooperation. Accordingly, we will draft the first Strategic Sustainability Plan to measure and validate the results and effectiveness of our choices.

## VISION

The vision that shapes our future starts from the European Union's six core values: human dignity, freedom, democracy, equality, rule of law, respect for human rights. These are accompanied by the goals of the **New European Bauhaus** initiative, whose central focus is the value of beauty, not only as a stand-alone aesthetic quality but as a measure of the protection of ecosystems, of the harmonious relationship between places and people, between economic growth and the use of resources. Politecnico di Milano is a European university through and through, in its roots and ambitions.

According to this perspective, education is central to the university's strategic lines. In this direction, we will continue to experiment and apply **innovative teaching models**, characterised by hybrid and multidisciplinary forms, interactive processes, far from classroom-taught lectures, in a cosmopolitan environment open to **international exchange**.

Scientific research, which has always been an integral part and a driving force of the Politecnico, will open new opportunities with a focus on the **stable recruitment of young researchers**, also thanks to the collaboration with already existing European networks and new ones that we will create to consolidate our goals in talent development. Also, we must remind the many initiatives of the National Recovery and Resilience Plan (NRRP) that puts us in a strong position to open new innovation scenarios.

It will therefore be crucial to rethink **physical space** to create more flexible places for study, research, and exchange; places that are sustainable (from an environmental and energy point of view), welcoming (to promote well-being and safety), accessible and liveable. Places that extend the university within the city and the **local area**, both at a physical and cultural level, to face new events, starting with the **2026 Winter Olympics**.

## POSITIONING

Politecnico di Milano adopts **multi-directional strategies according** to the context it refers to, starting from the Italian one. A context in which, in addition to increasing the number of graduates, there is still much to be done on the gender gap side, especially in STEM (Science Technology Engineering and Mathematics) subjects, and in strengthening high-level education.

The Italian university system is also characterised by low attractiveness, public funding notoriously below the OECD average, and the effects of a poorly rewarding resource distribution policy. These are all factors that have strongly steered Politecnico's research efforts towards **international funding** and joint initiatives with **industrial partners**. From large companies to **start-ups**, Politecnico is at the centre of a competitive and highly innovative ecosystem.

It is therefore not surprising that, despite the constraints imposed by still rather rigid disciplinary boundaries, Politecnico has distinguished itself for its ability to develop joint initiatives aimed at exploring **transdisciplinary topics** with partner universities in both Italy and overseas, paying close attention to the **quality of outgoing profiles**.

Not least, our university has invested, with great conviction, in social **responsibility**, cooperation, and educational development initiatives. Indeed, the university is now once again a point of reference for the growth of local communities. An extraordinary opportunity for social mobility and inclusion.

## PEOPLE

**1,169** professors - **334** donne and **55** international

**458** researchers - **156** women and **42** international

**745** postdocs - **293** women and **115** international

**851** lecturers - **266** women and **184** international

**1,600** PhD students - **525** women and **391** international

**1,292** technical-administrative staff - **784** women

**210,000** members of the Alumni community

**467,600** m<sup>2</sup> for students, researchers, companies, citizens

## RESEARCH

**31,000** papers (2017-2022)

**20** PhD courses

**279** research labs

**8** big infrastructures

**67** Joint Research Platforms

€ **189** million from Horizon 2020, **34** ERC

€ **64** million from Horizon Europe, **17** ERC

€ **181** million from self funding (2022)

## EDUCATION AND LEARNING

**48,000** students - **8,200** international

**24** Bachelor Degree Programmes - **1** with another university

**44** Master's Degree Programmes - **4** with other universities

**131** Specializing Masters and Postgraduate Programmes

**100** MOOC (Massive Open Online Courses)

**98%** employability **1** year after graduation

## SOCIAL RESPONSIBILITY

**4** Off Campus with more than **70** events on local areas

**56** projects funded by Polisocial Award - € **4.8** million funded by 5x1000 (2012-2022)

**100** cooperation and development projects in **30** countries (2012-2022)

**100,000** visitors/year for exhibitions and cultural events

**122** start-ups in PoliHub - € **30** million fundings (2022)

## SWOT ANALYSIS

The SWOT Analysis provides a picture of Politecnico's **strengths** and **weaknesses, opportunities** and **threats** regarding its positioning in the local, national and international context, based on the needs, expectations and goals expressed by a detailed analysis conducted among the relevant stakeholders.

The first distinguishing feature is certainly Politecnico di Milano's prestige, which, from the quality of education and research to economic soundness, places it on the shortlist of the twenty best universities in the world in its three domains of study: **10th in Architecture, 8th in Design and 18th in Engineering according to the QS World University Rankings 2023**. Yet, there are still many structural weaknesses: from the limited availability of spaces to the low degree of internationalisation of teaching staff and the limited ability to influence the country's development policies. In addition, it faces contingent threats, dictated by the critical geopolitical situation, the widespread distrust in institutions and the limited resources available compared to major international universities. These should not, however, limit our natural inclination to accept new challenges and opportunities.

This is why, to support the identification of the actions in this plan, the analysis of internal factors (resources and limitations) and external factors (favourable and unfavourable external circumstances) was conducted with particular attention to the following areas of strategic interest: **People, Education, Research, Social Responsibility**.

## STRENGTHS

**NATIONAL AND INTERNATIONAL REPUTATION**

**QUALITY OF EDUCATION AND RESEARCH AND RELATED INFRASTRUCTURES**

**POLITECNICO COMMUNITY'S SENSE OF BELONGING TO THE INSTITUTION**

**ECONOMIC AND FINANCIAL SOUNDNESS AND SELF-FINANCING CAPABILITY**

**RELATIONS WITH COMPANIES, COMMUNITY, INSTITUTIONS, AND OTHER UNIVERSITIES**

## OPPORTUNITIES

**NETWORKS OF EXCELLENT UNIVERSITIES AT THE INTERNATIONAL LEVEL**

**LIFELONG LEARNING ACTIVITIES**

**CRITICAL EMERGING CHALLENGES**

**IMPORTANCE OF SUSTAINABLE DEVELOPMENT GOALS**

**AVAILABILITY OF EXTRA FUNDING (NRRP)**

## WEAKNESSES

**INTERNATIONALISATION OF TEACHING STAFF**

**AVAILABILITY OF SPACES FOR TEACHING AND RESEARCH**

**ABILITY TO INTERACT WITH LARGE INTERNATIONAL COMPANIES ON RESEARCH TOPICS**

**ABILITY TO INFLUENCE THE COUNTRY'S DEVELOPMENT POLICIES**

**ABILITY TO GENERATE INNOVATIVE PATENTS AND SPIN-OFFS AND THEIR GROWTH**

## THREATS

**COMPLEXITY OF THE GLOBAL POLITICAL AND ECONOMIC SITUATION**

**LIMITED RESOURCES IF COMPARED TO LEADING INTERNATIONAL UNIVERSITIES**

**WIDESPREAD SOCIETAL DISTRUST IN TECHNICAL-SCIENTIFIC SKILLS AND KNOWLEDGE**

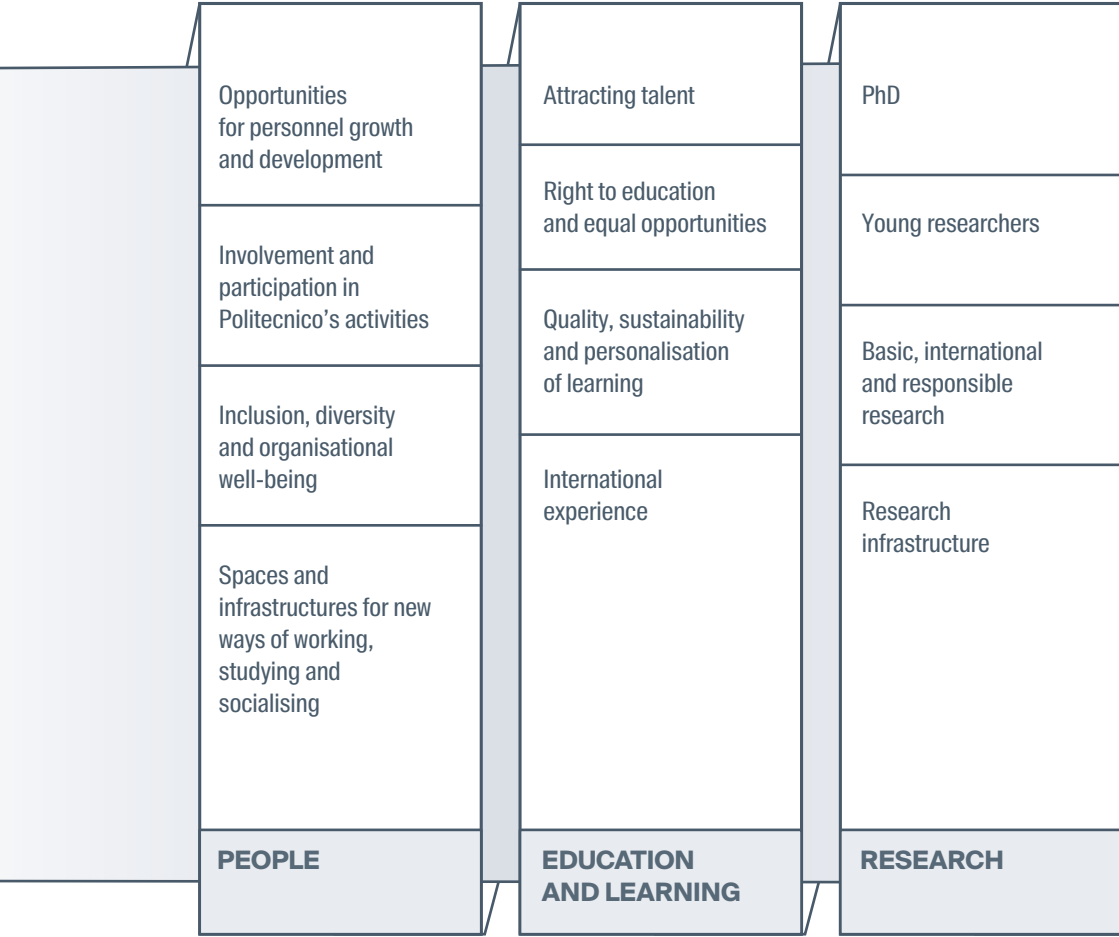

**STRONG INTERNATIONAL UNIVERSITY COMPETITION**

**MANAGEMENT OF HUMAN RESOURCES RECRUITED AFTER NRRP**

# ACTION MAP

## SUSTAINABLE GROWTH

# STRATEGIC GUIDELINES

## PEOPLE

People are the beating heart of Politecnico di Milano. A diverse community of researchers, professors, technicians, administrators, and students from today and the past. A large community that feeds all our activities, from research to teaching, from innovation to social service. People's serenity and well-being, a sense of belonging to the institution and pride in being part of it are key conditions for everyone to express themselves to the fullest and they also define the quality of the work we carry out.

It is our responsibility **to attract the best national and international profiles:** students, scholars, researchers, and professionals with a high and proven cultural and scientific background. It is our duty to bring out talents, to indulge passions and aspirations, to allow everyone to demonstrate and enhance their potential for personal and professional growth, **to promote inclusion and diversity, and to accommodate,** when necessary, the small and great vulnerabilities that lie hidden in each of us.

For this, the Politecnico community must work in harmony with **flexible work and study spaces** that support personal needs, in line with new organisational and teaching processes. Contemporary spaces that meet the demands of the university population and citizens in terms of semantics, functionality and meaning.

## PEOPLE: MAIN ACTIONS

### **OPPORTUNITIES FOR PERSONNEL GROWTH AND VALORIZATION**

Sustainable growth that rewards scientific and cultural qualification and professionalism

Continuing education

### **INCLUSION, DIVERSITY AND ORGANISATIONAL WELL-BEING**

Diversity and inclusion, with specific attention to gender equality

More inclusive work environments for people with disabilities or SLDs

Investments in well-being and corporate welfare

### **INVOLVEMENT AND PARTICIPATION IN POLITECNICO'S ACTIVITIES**

New channels of discussion and internal communication

Participation of students and PhD students in Politecnico's life

### **SPACES AND INFRASTRUCTURES FOR NEW WAYS OF WORKING, STUDYING AND SOCIALISING**

Working spaces redesigned to favour new ways of working

Study spaces to encourage the presence of students on campus

## PEOPLE: KPIs

### **OPPORTUNITIES FOR PERSONNEL GROWTH AND VALORIZATION**

**150** New Researchers

**75%** of Professors and Staff trained  
in Innovative Skills

### **INVOLVEMENT AND PARTICIPATION IN THE POLITECNICO'S ACTIVITIES**

**+100%** Part-time Activities for Undergraduate  
and Graduate Students

### **INCLUSION, DIVERSITY AND WELL-BEING AT WORK**

**40%** of Female representation in new research recruits  
Full campus accessibility

**8,000** Subscriptions to Welfare Initiatives

### **SPACES AND INFRASTRUCTURES FOR NEW WAYS OF WORKING, STUDYING AND SOCIALISING**

**+50%** Spaces equipped for study and group-work

**+500** Study Spaces

**+50,000** m<sup>2</sup> of green spaces, sports grounds,  
services, offices, laboratories

# STRATEGIC GUIDELINES

## EDUCATION AND LEARNING

Learning is not acquiring erudition but gaining education and developing awareness. Teaching is a responsibility towards new generations, the planet and society. Education is, first and foremost, a great opportunity for individual and collective growth that values merit and does not discriminate. This is why it is crucial to foster an environment that supports **the right to education, equal opportunities and social inclusion**.

Our university will further strive to attract and select the best students from all over the world as well as ensure that they receive **high-quality international education** through the acquisition of skills and tools that will enable them to smoothly move into the labour market.

For these reasons, the process of experimenting with innovative teaching methodologies, long initiated by our university, will be consolidated and implemented, defining new tools and **new organisational, orientation and pedagogical models**. Politecnico will strengthen personalised paths, new professional, multi- and inter-disciplinary profiles, continuing education, and lifelong learning.

## EDUCATION AND LEARNING: MAIN ACTIONS

### **ATTRACTING TALENTS**

Redesigning promotion policies

Revision of the selection criteria

### **QUALITY, SUSTAINABILITY AND PERSONALISATION OF LEARNING**

Redefining the governance  
model of teaching

Consolidating innovation  
within educational paths

Strengthening lifelong  
learning

### **RIGHT TO EDUCATION AND EQUAL OPPORTUNITIES**

Support and enhancement  
of diversity

Increased action and investment  
in favour of students

### **INTERNATIONAL EXPERIENCE**

Increasing international  
exchange opportunities

Developing the European  
Technical University

Increasing attractiveness and  
professors' international mobility

## EDUCATION AND LEARNING: KPIs

### **ATTRACTING TALENTS**

**25%** of International Students

### **RIGHT TO STUDY AND EQUAL OPPORTUNITIES**

**30%** Gender balanced Study Programmes  
**+25%** Student Support and Scholarships

### **QUALITY, SUSTAINABILITY AND PERSONALISATION OF TRAINING**

New Teaching Model

**130 Corsi MOOC** (Massive Open Online Courses)

### **INTERNATIONAL EXPERIENCE**

**2,500** Outgoing Students

Developing the European Technical University

**+100%** Courses with International Professors

## STRATEGIC GUIDELINES

### RESEARCH

Politecnico di Milano's research is developed within the boundaries dictated by the principles of scientific and ethical integrity and is aimed at having a positive impact on the major challenges of modern society. It serves the Sustainable Development Goals (SDGs), respecting the environment and the planet.

Therefore, our university intends to support and promote excellence and frontier research, increasing its competitiveness also in the context of European university alliances. Accordingly, measures aimed at the development of PhD programmes, the support of young researchers and the selection of incoming profiles are important. The development of special projects, capable of capturing and anticipating future trends in scientific research and technological development, is crucial.

The contribution to the measures and actions of the National Recovery and Resilience Plan (NRRP) is decisive, as is the active involvement of business partners in the field of applied research. Joint projects with companies and public institutions, as well as business initiatives and the development of research infrastructures are also pivotal thanks to the growth of the innovation district in the Bovisa area.

## RESEARCH: MAIN ACTIONS

### **PHD**

Interdisciplinary scholarships  
focused on the SDGs

Internationalisation

Administrative support

Training of supervisors

Young researchers' skills  
empowerment

### **YOUNG RESEARCHERS**

Network of Talent  
Academies

Young researchers, industry  
and entrepreneurship

Individual projects  
by young researchers

### **BASIC, INTERNATIONAL AND RESPONSIBLE RESEARCH**

Interdisciplinary round tables  
and discussions on SDGs

Criteria for research assessment  
and development of responsible  
research policies

Participation in European strategic  
research alliances and networks

Technology foresight

### **EXPERIMENTAL RESEARCH INFRASTRUCTURES**

Living Labs and Joint Research  
Platforms

Interdisciplinary labs  
and related staff training

University laboratories

## RESEARCH: KPIs

### **PHD**

**2,000** PhD students

### **YOUNG RESEARCHERS**

**75** Funded Projects assigned to Young Researchers

### **BASIC, INTERNATIONAL AND RESPONSIBLE RESEARCH**

**22** ERC-funded Projects

€ **105** million from Horizon Europe

### **EXPERIMENTAL RESEARCH INFRASTRUCTURES**

**3** New Laboratories

## **STRATEGIC GUIDELINES**

### **SOCIAL RESPONSIBILITY**

Social responsibility includes actions carried out as a complement and in synergy with teaching and research in favour of social, cultural, environmental, and economic development. They activate a process of mutual exchange and enrichment with civil society.

Our university wants to design and manage these initiatives even more broadly and across the board: from environmental sustainability and climate change mitigation to social innovation; from supporting entrepreneurship to science diplomacy; from open cultural, educational, and scientific events to projects with a major impact on the city and the region.

Within this framework, Politecnico intends to make its commitment even more meaningful, systematic, and organic; planned, managed, and participated; differential and visible to get the involvement and awareness of an increasingly large audience.

## SOCIAL RESPONSIBILITY: MAIN ACTIONS

### **SUSTAINABILITY PLAN**

First Strategic Sustainability Plan

Extensive portfolio of sustainability projects for our campuses and their cities

### **RELATIONS WITH THE LOCAL AREAS AND INSTITUTIONS**

Influential participation in institutional discussions

Polisocial, Off Campus and Living Lab as models for social innovation

New “Polimi4NonProfit” platform for mutual collaboration

### **SUPPORT FOR ENTREPRENEURSHIP**

Bovisa Campus as a platform for innovation

Full cycle: from proof of concept to start-up to scale-up

Entrepreneurship training

### **CULTURAL AND SCIENTIFIC DISSEMINATION ACTIVITIES**

Programming of communication initiatives for major architecture, design and engineering events

Extensive communication plan on sustainable development topics

Socio-cultural impact of the Technology Foresight Centre

### **INTERNATIONAL RELATIONS AND DEVELOPMENT COOPERATION**

Scientific and cultural diplomacy in international relations

Development cooperation activities as the ideal engine of our university

## SOCIAL RESPONSIBILITY : KPIs

### **SUSTAINABILITY PLAN**

First Strategic Sustainability Plan  
**+4** MW Production from Photovoltaics

### **CULTURAL AND SCIENTIFIC DISSEMINATION ACTIVITIES**

**360,000** Participants to the Cultural Events programme  
**6,000** Press releases on SDGs

### **RELATIONS WITH THE TERRITORY AND INSTITUTIONS**

Polimi4NonProfit platform  
**200** Organisations engaged by Off Campus

### **INTERNATIONAL RELATIONS AND DEVELOPMENT COOPERATION**

**12** Science Diplomacy Projects

### **SUPPORT FOR ENTREPRENEURSHIP**

**450** Supported start-ups  
**2,000** People trained in Entrepreneurship

## STEERING BOARD

The picture outlined so far describes a complex and challenging project, based on a **shared approach and constant interaction** ranging from Departments to Schools, to Campuses; from students to Alumni; from companies to public administrations; from cultural and service sector institutions to major international universities.

That is why, along with the Rector and the Executive **Vice Rectors**, we have introduced the Vice Rectors, committed to advancing and exploring the key issues of this mandate, supported by fifty Delegates. A model that, by its very definition, aims to characterise a shared commitment, a broad vision, and an inclusive management.
